DIFFERENCE BETWEEN TARIFF A AND TARIFF B ON ELECTRICITY TARIFFS

- The main difference between Tariff A and Tariff B in the City of Ekurhuleni lies in how your electricity consumption dictates the cost per unit. Tariff A increases the cost per kWh as usage increases, suited for low-consumption households (<815–819 kWh/month), while Tariff B offers a fixed rate per unit regardless of consumption, better for high usage.
- **Tariff A.1 (Indigents)** has been converted from an IBT to a flat kilowatt hours rate tariff and aligned with Eskom's 60Ampere Home lite rates. Customers will pay the same rate for all units above 50kWh – no more IBT rates.
- **Tariff A.2. (Non-indigents)** IMMS customers included, has been converted from an IBT to a flat kilowatt hours rate tariff. There is no Basic charge linked to this tariff. Customers will pay the same rate for all units above 50kWh – no more IBT rates.
- **Tariff B Residential Resellers** has reverted to a Basic charge and a flat kilowatt hours rate across all seasons and all time of use periods in the day.
The **Demand and Network access charge** components have been **removed**.

GENERAL CoE CHALLENGES

- The **significant outstanding debts and nonpayment for services rendered** limits available resources, making it challenging for the City to address all community needs within a single financial year.
- **Growing population** results in growing demand for services and resources which need to be addressed with limited resources.
- **Aging and constrained infrastructure** which requires resources to be allocated to refurbishments, upgrades and repairs.
- **Theft and vandalism of infrastructure** – city is increasing efforts to both prevent and respond to incidents.
